

# Covid Checklist

This Checklist will help Traders who go into people's homes in the course of their everyday work to establish expectations around COVID protocol, raise the confidence of residents and keep Kent safe.

## Before visiting the home

- ✓ I have read and considered the available guidance, including the Raising the Standard COVID resources.
- ✓ I have called the resident ahead of time to establish their expectations around COVID (but avoided asking the resident directly about their vaccination status) and discussed my Covid safety policies.
- ✓ I have carried out a risk assessment before visiting someone's home.
- ✓ I am mindful that the virus remains a serious health risk for many people.
- ✓ I have considered the health situation of anyone attending the home and the resident (giving extra consideration to those who may be particularly vulnerable).
- ✓ I am prepared to reschedule any appointment in the event of a positive COVID diagnosis or COVID symptoms from my staff or the resident.

## During the visit

- ✓ I have ensured the area of the work is well-ventilated.
- ✓ I have worn, or asked my staff to wear, a mask where possible.
- ✓ I have sanitised touchpoints including door handles, push plates and bars, exit buttons, chairs, and bathroom sinks.
- ✓ I have cleaned up after myself and safely disposed of cleaning materials.
- ✓ I have been considerate about people's COVID concerns.
- ✓ I have taken all reasonable precautions to protect against the spread of COVID-19.

By getting it right, TS Checked scheme members can help to keep COVID cases in Kent to a minimum and do their bit to keep their communities – and their businesses – happy, healthy, and resilient.
